IRYNA PETRUK

Data Analyst · Power BI

irpet93@gmail.com · +48 453 234 158 · linkedin.com/in/iryna-petruk

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience turning business requirements into trusted Power BI reports, KPIs and data products for Finance, Operations and Marketing. Strong in SQL, Excel and Power BI (DAX, semantic models, RLS), with hands-on work on data quality, governance and ETL pipelines in Azure/Databricks-connected environments. Finance and Economics background (MSc, Accounting and Auditing) with deep fluency in P&L, budgeting, cash flow and portfolio reporting. Used to working with business and IT stakeholders up to C-level and communicating findings clearly in English. Motivated to apply financial and analytical skills to credit, risk and asset financing data at Volvo Financial Services.

CORE SKILLS

- **Reporting & Visualization:** Power BI (advanced DAX, star-schema semantic models, Row Level Security, Power BI Apps), Excel (advanced), KPI and dashboard design
- **Data & SQL:** complex SQL queries, aggregations and data transformation; Python for ETL scripting
- **Data Platform:** ETL pipelines, data lake concepts, Azure and Databricks as BI data sources; Microsoft Fabric (upskilling)
- **Data Quality & Governance:** data validation and reconciliation, certified datasets, shared metric definitions, access management, documentation
- **Finance Domain:** P&L, Budget/Actuals/Forecast, cash flow, profitability, portfolio and investment reporting
- **Analytics:** variance and trend analysis, scenario comparisons, basic statistical techniques, data modelling
- **Collaboration:** requirements gathering, translating business needs into KPIs, presenting insights to business and IT stakeholders up to C-level

WORK EXPERIENCE

Data Analyst / Power BI Developer · DigiCode · Jul 2023 – Present

- Partner with Finance, Marketing and Operations stakeholders to translate business requirements into reports, KPIs and data products, owning delivery from data collection and modelling to deployment via Power BI Apps.
- Built governed semantic models (star schema, RLS, certified datasets) that serve as a single source of truth for executive reporting, ensuring accuracy and consistency of KPIs across teams.
- Drive data quality: validate hierarchies, reconcile figures against source systems, and investigate and resolve data issues with data owners.
- Developed advanced DAX measures (time intelligence, variance analysis, scenario comparisons) giving leadership actionable insight on spend and operational KPIs.
- Automated reporting pipelines from data extraction to dashboards, cutting manual work by 10 hours/week and improving reliability.
- Implemented access governance and roll-out controls across business units to protect confidential financial data.
- Act as senior point of contact in the team: review BI work, set reporting standards and support knowledge transfer.

Financial Manager & Data Analyst · Stfalcon · Nov 2019 – Jun 2023

- Built financial models and reporting frameworks used by C-level for strategic planning: budget, cash flow, profitability and promo spend ROI.
- Tracked and analysed P&L, promotional spend and operating expenses, delivering performance insights for cross-functional decisions.
- Designed structured data collection and reporting processes in Excel and Google Sheets, reducing the reporting cycle from 10 days to 2 days and improving accuracy.

- Worked with Finance, Product and Operations teams to scope reporting needs and present data as dashboards and leadership presentations.

SELECTED PROJECTS

CD PROJEKT Back-Catalogue Health Hub · Power BI, PostgreSQL, dbt, Python, GitHub Actions

- Multi-page executive dashboard: Revenue, Gross Margin, Budget vs Actuals and OPEX, with variance analysis and drill-down by quarter, region, category and channel.
- DAX measures for Actual/Budget revenue, revenue variance %, gross margin %, COGS ratio and net profit variance.
